The Carlisle SynTec- Nationwide Foam Referral Program has been a win - win for all parties involved with CSL Materials here in Texas.

The program they offer is easy; it takes no heavy lifting on my part. I canvas the team for re-roofing projects and when any single ply jobs come my way we simply fill out the request a quote form from NFR and submit it. The entire process takes less than 3 minutes. What's great is that the program gives the roofing contractor another value added service to offer the client.

So far, just the leads that we have provided, we have assisted in keeping over 65,000lbs of old membrane and 92,000 cubic feet of old insulation out of local landfills.

Over the past 14 months CSL Materials has received over \$1500 from Nationwide Foam Recycling for providing leads for recycling rigid foam and membrane tear off material on all our single ply re-roofing jobs!
